PROJECTS / OPEN-SOURCE

Awareness About Digital Frauds. | [Link](#)

HTML, CSS, JavaScript, Flask

The "Awareness About Digital Frauds" initiative is part of global and regional efforts to educate the public about online scams and digital fraud. These platforms provide resources to help individuals recognize, avoid, and respond to scams, ranging from phishing and fake websites to investment fraud and more.

Real Time Bus Tracking System | [Link](#)

HTML, PHP, CSS, Hack

The bus tracking system in SISTec Chalo is designed to provide students with accurate, real-time information on the location of college buses. By integrating GPS tracking technology, this feature helps students keep track of bus schedules, anticipate arrival times, and better manage their time, especially during peak hours.

My-Portfolio | [Link](#)

HTML, CSS, JavaScript

To present a comprehensive portfolio that highlights my skills, experience, and achievements in fields such as programming, web development, and content creation. My portfolio is designed to showcase my versatility and technical abilities, particularly in Python, Flask, Node.js, and frontend development,

ResultShodh | [Link](#)

HTML, Python

ResultShodh eliminates the need for manual checks, offering a quick, efficient, and error-free way to access detailed exam results, SGPA, CGPA, and other relevant academic data. Its integration with the college's existing infrastructure enhances workflow efficiency, reduces administrative burden, and allows for easy generation of result-based reports in various formats, ultimately enhancing the overall academic management process.
